Appointment: 04/19/2024 10:00 AM

History of Present Illness (Denise R. Melanson, LVN 04/19/2024 10:23 AM)

The patient is a 85 year old female who presents with a complaint of a skin problem. The skin problem has been occurring for 3 months. The course has been increasing. The skin skin problem is located to the face (nose). Skin problem is characterized as cracking, crusty, raised above the skin and red. There has been associated bleeding and pain, while there has been no fever, itching or weeping. Note for "Skin problem": Patient states she has an appointment with Dr. Patel in Victoria in August but was told if her doctor's office called she may be able to be seen sooner.

Allergies (Denise R. Melanson, LVN; 04/19/2024 10:17 AM)

No Known Drug Allergies 04/19/2024

Allergies Reconciled
