**FACE SHEET**

Peggy A Hubbard  
MRN: NA  
DOB: 28 Aug 1951 (72 yo)  
Female

**Allergies**

- No known allergies

**Problems**

- Anxiety disorder (disorder).
- Hypertensive episode (disorder).

**Medications**

- BUPROPION HCL 300MG XL
- zolpidem 10 mg tablet
- ESCITALOPRAM 20MG
- BUPROPION HCL 300MG XL
- metoprolol tartrate 50 mg tablet
- cyclobenzaprine 10 mg tablet
- Xanax 0.5 mg tablet
- Neurontin 100 mg capsule
- PRAVASTATIN 20MG
- Lasix 20 mg tablet
- Diovan 160 mg tablet

**History****PMHx**

- Anxiety
- HTN
- Chemical Dysbalance

**PSHx**

- Gallbladder Removal
- Hyaterectomy

**FHx**

- mother: Deceased
- father: Deceased

**SHx**

- Tobacco: Never smoker
- Alcohol: Do not drink
- Drug Abuse: No illicit drug use
- Safety: Wear seatbelts

**OB & Preg Hx**

- G2 T0 P0 A0 L0
- Pregnancy Comments: married

**Hospitalizations**

- No hospitalizations / procedures have been documented for this patient

**Implantable Devices**

- No implantable devices has been documented for this patient

**MEDICATION REVIEW AND COUNSELING:** All medications, including benzodiazepine and narcotics were reviewed with the patient and thorough counseling was provided by the nurse, as well as by the doctor. Counseling on smoking and seat belt safety was done.

**MIPS Reporting Measures**

G8510 SCREENING FOR DEPRESSION IS NEGATIVE/ NO FOLLOW UP PLAN REQUIRED

G8482 FLU previously received

G8417 BMI, IS DOCUMENTED ABOVE NORMAL PARAMETERS AND FOLLOW UP PLAN IS REQUIRED

G8427 ELIGIBLE CLINICIAN ATTEST TO DOCUMENTING UPDATED, REVIEWED PATIENTS CURRENT MEDICATION

1101F PT SCREENING FOR FUTURE FALL RISK: 0-1 FALLS WITHIN THE PAST YEAR

**Assessment**

1. Fatigability. I found the reason is that she's taking Wellbutrin at night and that looks like that is the way it's prescribed, so I will review her chart. So far, I reviewed it and I did find who started her on this amount and at nighttime, so I told her to switch that to in the morning, keep the Lexapro at night and we will give her 6-8 weeks and see her then to see if that problem resolves. If so, well and good. If not, then we will address it.
2. Left-sided facial and temporal facial area lesions (2) about 5-6cm each. They look skin-colored, brownish. I told her we can refer her to a skin doctor. They don't want to see Dr. Cox, so we will send her to someone else.
3. Chronic lumbar disc disease. She sees Dr. Choudhri and that is why she's on Hydrocodone.
4. Hyperlipidemia. She is listed on Pravastatin 20mg q.h.s.
5. Blood pressure. She's on Metoprolol 50mg b.i.d., Amlodipine 5mg q.d. and Diovan 160mg q.d.
6. Bilateral knee and full thickness supraspinata tendon tear. She's seeing Orthopedics, Dr. Perez.

**Plan**

1. As stated above, the patient will switch the Wellbutrin to morning and refer her to a skin doctor.
2. I will otherwise see her back in 8 weeks and then we will further go from there.
